

AI-Humanity & Society Workshop

Join this dynamic two-part workshop exploring the societal implications of AI and Generative AI (GenAI) technologies. The workshop seeks to encompass AI not only as a methodological tool but also as a focal subject of study. Open to early-career researchers from Ludwig Maximilian University of Munich (LMU) and Tel Aviv University (TAU), it offers a unique platform to engage with AI as both a research tool and a subject of study.

Key Dates:

- Online Session: November 19, 2024 (10 am CET / 11 am IST)
- In-Person Workshop: March 17-19, 2025 (location announced in January)

Selected participants are required to attend both events

Participants will:

- Assess AI/GenAI applications in humanities and social sciences research.
- Discuss ethical, legal, and societal impacts of AI technologies.
- Strategize AI integration in education, government, and industry.

Applications:

Open to early-career scholars from LMU and TAU including pre-tenured faculty, postdoctoral researchers, and advanced PhD students from the Humanities and Social Sciences. Apply here by September 27, 2024. Questions? Contact michallinder@tauex.tau.ac.il (TAU) or Juliane Gierach (LMU).
